-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 October 2004.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rodgers (U.S. Patent 2,881,457).

Rodgers discloses a dock leveler including a deck having right and left upper plates (64). There are a plurality of lower support beams (52, 54, 56) and a joint (not labeled, but shown at line 2-2 in Figure 1) between the right and left upper plates. There is a lip (76), but it is not movable. It is very well known in dock levelers to use a pivotally mounted lip. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a pivotally mounted lip with Rodgers in order to avoid damage thereto from a truck, decrease storage space and improve the transition between a truck and the dock, as is common practice in the art.

There is a connecting bar (54, 56) disposed between the plates. While the dimensions of this bar are not configured as claimed in claim 3, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used this configuration in order to achieve desired resistance to loading, as is common in structural engineering.

Art Unit: 3671

Weld beads are not disclosed; however, welding is a well known means of connection and it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used weld beads along the joint of Rodgers in order to improve structural rigidity, for example.

There is a gap between the plates. Regarding the limitation of "variable gap," there is no disclosure in the specification of this gap that is not met by Rodgers.

Treads are well known and it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a tread with Rodgers in order to increase safety, as is well known. That there is a gap between the plates is deemed to meet the recitation of "shifted out of registry."

The joint is substantially parallel to the support beams (52).

The joint is centrally located.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.
